- The Language of Hollywood **Introduction :**

Language :

Language is our primary source of communication. It's the method through which we share our ideas and thoughts with others. Some people even say that language is what separates us from animals and makes us human.

There are thousands of languages in this world. Countries have their own national languages in addition to a variety of local languages spoken and understood by their people in different regions. Some languages are spoken by millions of people, others by only a few thousand.

English was originally the language of England, but through the historical efforts of the British Empire it has become the primary or secondary language of many former British colonies such as the United States, Canada, Australia, and India. Currently, English is the primary language of not only countries actively touched by British imperialism, but also many business and cultural spheres dominated by those countries. It is the language of Hollywood and the language of international banking and business. As such, it is a useful and even necessary language to know.

Discussion :

1 English is the International Common Tongue

There are several factors that make the English language essential to communication in our current time. First of all, it is the most common foreign language. This means that two people who come from different countries (for example, a Mexican and a Swede) usually use English as a common language to communicate. That's why everyone needs to learn the language in order to get in touch on an international level. Speaking it will help you communicate with people from countries all over the world, not just English-speaking ones.

² Education

English is also essential to the field of education. In many countries, children are taught and encouraged to learn English as a second language. Even in countries where it is not an official language, such as the Netherlands or Sweden, we will find many syllabi in science and engineering are written in English. Because it is the dominant language in the sciences, most of the research and studies you find in any given scientific field will be written in it as well. At the university level, students in many countries study almost all their subjects in English in order to make the material more accessible to international students.

Ghana	66.67	18,000,000
Australia	97.03	17,357,833
Thailand	27.16	17,121,187
South Africa	31	16,424,417

⁴ **The Internet and Press**

On the Internet, the majority of websites are written and created in English.

Even sites in other languages often give you the option to translate the site. It's the primary language of the press: more newspapers and books are written in English than in any other language, and no matter where in the world you are, you will find some of these books and newspapers available. In fact, because it is so dominant in international communication, you will find more information regarding nearly every subject if you can speak this language.

² **Resources Make Learning English Easy**

Although many people think that it is very difficult and confusing, English is actually the easiest language of the world to learn because there are so many resources available. As soon as you decide you want to learn, there are thousands of resources on the Internet and in bookstores. I'm not just talking about lessons and grammar books. You can supplement traditional learning

materials with children's TV shows and books. I suggest watching as much TV as you can, in English with English subtitles, and you will pick up conversational English in no time.

6. Travel and Business

With good understanding and communication in English, you can travel around the globe. Because it is the international language for foreigners, it's easy to get assistance and help in every part of world. You can test it by online travel. Any travel booking site you can find will have English as a booking option.

English skills will also help you in any business venture you choose to follow. If you visit some offices, companies, governmental organizations, or even math or engineering companies, you will see the importance of English. Any big company will hire their professional staff after getting to know whether the people they are hiring are good at English or not. Companies who want to function at an international level only consider their staff well educated if they are good English speakers, writers, and readers.

⁷The Language of Hollywood

Everyone knows that Hollywood is in the United States, and that the biggest television and music industries in the world are based there. As I mentioned above, TV and movies are a great way to practice your English once you start learning. What's more, knowing English opens up thousands of movies, television shows, and games for your enjoyment. If you want to one day work in the entertainment industry, English is even more essential.

Those who are still unaware of the importance of English should start learning it, as a time will come when everything will be understood, spoken and written in English. In a lot of ways, that time is already here. Go ahead, watch some media, and get an idea of the language. You won't be disappointed.

Conclusion:

So according to the importance of English language in various fields of the world it very necessary to start learn and grow interest in the language from childhood for the future endeavour. English is not only very interesting language but also the easiest language to learn as comparing to other languages for the beginners in the world.
